F1 Hybrid Tomato

- Determinate plant with good branching
- Good fruit shape and size retention
- Early harvest
- High yield with good foliage disease tolerance
- Very good fruit firmness with uniform color development
- Fruits are blocky oval in shape

GO – JOHAR

F1 Hybrid Tomato

- GO - JOHAR Tomato Seeds is a high-yielding determinate tomato hybrid developed by GreenOrizin.
- It is known for its excellent fruit quality and high fruit firmness.
- The plant has good stay greenness and dark green foliage.
- Johar Tomato Seeds is having good heat set.
- Fruit Color: Ripe fruits are attractive red & glossy
- Fruit Shape: Flat Round type, uniform green
- Fruit Weight: 80-100gms

GO -Ganesh (1021)

F1 Hybrid Tomato

- Plant Habit : Semi Indeterminate
- Fruit Shape : Oval
- Fruit Shoulder Color : White
- Fruit Weight : 75-85 Gm
- Maturity(Dat) : 80-85 Day
- Bacterial Wilt Tolerant

GO-Diksha

F1 Hybrid Capsicum

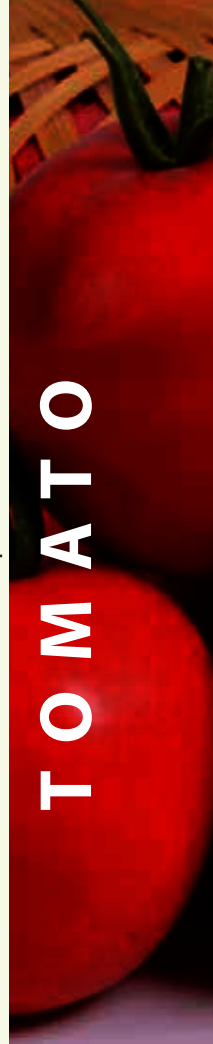

- Plant : Dense and Strong
- Fruit Shape : Square
- Fruit Color : Shiny Green
- Fruit Length : 8-10 cms
- Fruit Diameter : 4-5 cms
- Fruit Weight : 90-100g
- Maturity : 60-65 days after transplantation
- Specialities : Suitable for long distance shipping, Blocky fruit with 4 lobes, Suitable for Open & Protected Cultivation (Under Polyhouse & Nethouse)

GO-Indra Sena

F1 Hybrid Capsicum

- Good Cold set & Heat Set
- Wider adaptability
- High Yielding capacity
- Color: Good Uniform Green Fruits
- Seed Rate: 250 - 300 g per acre.
- Sowing: Direct in main field.
- Spacing: Row to Row and Plant to Plant - 150 x 45 cm

TOMATO

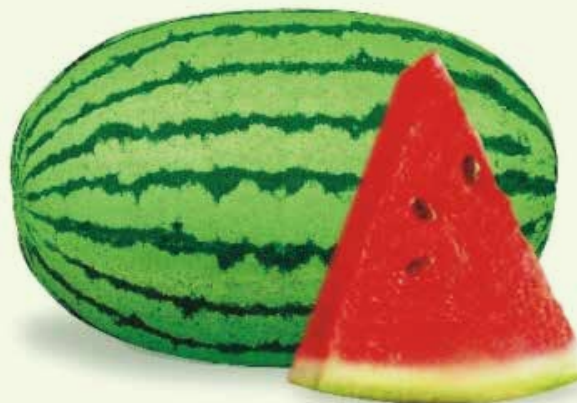

CAPSICUM

GO – Bheeshma

F1 Hybrid Watermelon

- Medium to early hybrid. Exhibiting good shipping and keeping qualities. Exhibiting wide adaptability. Striped fruits ideal for long transportation
- Germination Percentage - Min 70%
- Physical Purity - Min 98%
- Genetic Purity - Min 95%
- Sowing Season - Kharif, Rabi and Summer

GO-Sweetheart-095

F1 F1 Hybrid Watermelon

- Days To Maturity: 65 - 70 Days After Sowing
- Fruit Color: **Black**
- Flesh Color: **Dark Red**
- Sweetness: **Very Sweet** (TSS 13%)
- Fruit Weight: 4 - 5 Kg
- Fruit Shape: **Oblong**
- Remark: **Good For Long Transport, Small Seed Icebox**

GO-Sweet Raja

F1 Hybrid Musk Melon

- Days To Maturity: 70 - 75 Days After Sowing
- Fruit Color / Skin: **Creamy Rind With Orange flesh**
- Fruits Shape: **Round**
- Flower Weight: 1 - 1.2 Kg
- Remark: **Dense Netted with Creamy White Rind With Orange Flesh**

GO - Saanvi

F1 Hybrid Bitter Gourd

- Type : **Half Long Spiny**
- Maturity Days : 60-65
- Fruit Weight : 100-120 gm
- Length (cm) : 15-18 cm
- Plant Type : **Highly Vigorous vines**
- Fruit Colour : **Dark Green**
- Fruit Type : **Medium long spine**

GO- Adhya

F1 Hybrid Bitter Gourd

FRUIT SHAPE	LONG SLENDER
FRUIT COLOR	WHITE
FRUIT LENGTH	35-45 CM
